Professional Profile

Systems Engineer with solid experience in technical support, customer service, software development, and API integrations. I specialize in translating business needs into functional technical solutions. I enjoy communicating with clients, understanding their challenges, and building scalable solutions that enhance their experience.

Education

Universidad Adventista del Plata

2020 – 2024

Bachelor's degree in Systems Engineering

Entre Ríos, Argentina

- Specialization in software architecture, backend development, and systems optimization
- Final project: Development of a property appointment scheduling plugin (matchfloor.com)
- Built with React.js and Nest.js, deployed using Docker and GitHub Actions

Experience

Gervasoni Ingeniería

January 2025 – Present

CSM & API Integrations Specialist

Remote

- Developed and implemented integrations between client APIs and CRM platforms
- Automated workflows to improve internal customer support processes

Universidad Adventista del Plata

June 2023 – Present

Full Stack Developer

Remote

- Modernized 5+ legacy systems, enhancing security, performance, and compatibility
- Implemented a data integration system allowing external companies to securely access information of over 3,000 users

Mi Portafolio Digital

October 2022 – August 2023

PHP Developer

Remote

- Developed and integrated an e-commerce site with 4 external platforms (including Amazon) via REST APIs
- Optimized product upload and inventory synchronization processes

Projects

MatchFloor - Property Appointment Scheduling | *React.js, Nest.js, Docker*

2024

- Developed a comprehensive property appointment scheduling plugin as final university project
- Built responsive frontend using React.js with modern user interface design
- Implemented robust backend API using Nest.js with secure authentication and data management
- Deployed using Docker containers and automated CI/CD pipeline with GitHub Actions
- Allows users to book property visits online with real-time availability checking

TraeDeUSA E-commerce Platform | *PHP, REST APIs, Amazon Integration*

2022-2023

- Developed and launched traedeusa.com, a comprehensive e-commerce platform
- Integrated with 4 major external platforms including Amazon via REST APIs
- Implemented automated product upload and inventory synchronization system
- Optimized performance to handle high-volume product catalog updates and real-time stock management

Technical Skills

Languages: PHP, JavaScript, TypeScript, HTML/CSS, SQL

Frameworks & Libraries: React.js, Nest.js, Node.js

Technologies: REST APIs, Docker, GitHub Actions, CRM Integration, Chatbots

Languages: Native Spanish, Advanced English (B2 level)
